

EXPERIMENT 10

AIM: Develop programs using features parameters in a CURSOR, FOR UPDATE CURSOR, WHERE CURRENT of clause and CURSOR variables.

SOLUTION:

-- Create employee table

```
CREATE TABLE employee (  
    empno NUMBER(5) PRIMARY KEY,  
    ename VARCHAR2(20),  
    dept VARCHAR2(10),  
    salary NUMBER(10,2)  
);
```

-- Insert data

```
INSERT INTO employee VALUES (101, 'Ravi', 'IT', 25000);  
INSERT INTO employee VALUES (102, 'Sita', 'HR', 22000);  
INSERT INTO employee VALUES (103, 'Ramesh', 'IT', 27000);
```

-- Save changes

```
COMMIT;
```

```
SET SERVEROUTPUT ON;
```

```
DECLARE
```

```
/* Cursor with Parameter */
```

```
CURSOR emp_cur(p_dept VARCHAR2) IS
```

```
    SELECT empno, ename, salary
```

```
    FROM employee
```

```
    WHERE dept = p_dept
```

```
    FOR UPDATE;
```

```
/* Cursor Variable (REF CURSOR) */
```

```
TYPE emp_ref IS REF CURSOR;
```

```
c_emp emp_ref;
```

```
v_empno employee.empno%TYPE;
```

```
v_name employee.ename%TYPE;
```

```
v_sal employee.salary%TYPE;
```

```

BEGIN

    DBMS_OUTPUT.PUT_LINE('Employee Details (IT Department)');

    /* Open Parameter Cursor */

    OPEN emp_cur('IT');

    LOOP

        FETCH emp_cur INTO v_empno, v_name, v_sal;

        EXIT WHEN emp_cur%NOTFOUND;

        /* Display Data */

        DBMS_OUTPUT.PUT_LINE(v_empno || ' ' || v_name || ' ' || v_sal);

        /* Update Salary using WHERE CURRENT OF */

        UPDATE employee

        SET salary = salary + 1000

        WHERE CURRENT OF emp_cur;

    END LOOP;

    CLOSE emp_cur;

    Select * from employee;

    /* Cursor Variable Example */

    OPEN c_emp FOR

    SELECT empno, ename FROM employee;

    DBMS_OUTPUT.PUT_LINE('Employee Names Using Cursor Variable');

    LOOP

        FETCH c_emp INTO v_empno, v_name;

        EXIT WHEN c_emp%NOTFOUND;

        DBMS_OUTPUT.PUT_LINE(v_empno || ' ' || v_name);

    END LOOP;

    CLOSE c_emp;

    COMMIT;

END;

/

```

Output:

Employee Details (IT Department)

101 Ravi 26000

103 Ramesh 28000

Employee Names Using Cursor Variable

101 Ravi

102 Sita

103 Ramesh

PL/SQL procedure successfully completed.
